

ROMEX® Decor

High quality, industrial coatings do not have to be dull, grey and unattractive. NO! They should be light and friendly, so as to have a positive psychological effect on your employees. Light coloured floors, preferably with some decorative effects, have been proved to have a positive influence on the productivity of employees. That is why ROMEX®, after many years of experience in the decorative design sector of industrial flooring, have created the Decor range, which makes the most of these motivating, economical and aesthetic aspects. Through use of high quality, coloured chips, including gold and silver, or drops of other coloured coating components, or the manufacture of industrial terrazzo using epoxy resin as a binding agent, all individual tastes and company requirements can be covered. Choose from a variety of decors from our ROMEX® Decor range and find what fits best to you and your company.

ROMEX® industrial floors live up to what they promise!

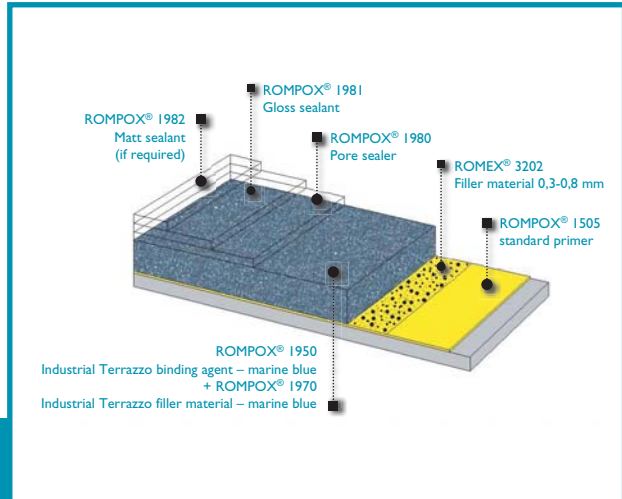

ROMEX® decorative flooring in a conference room – 15 years old

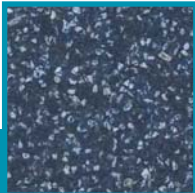

ROMPOX® Industrial Terrazzo

ROMPOX® Industrial Terrazzo is uniquely decorative and thus very friendly and motivating for all work areas. It is also highly chemically resistant and has excellent abrasion resistance which means it is suitable for all areas with heavy loads. It is available in layer thicknesses of 5 – 15 mm. Industrial Terrazzo is smoothed by hand or machines.

ROMPOX® Industrial Terrazzo is used in production areas in heavy industry, factories and assembly halls as well as workshops for fine mechanics and similar areas.

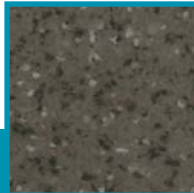

System set up of ROMPOX® Industrial Terrazzo for example 1950 – marine blue

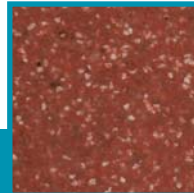

ROMPOX® 1950
Industrial Terrazzo
- marine blue

ROMPOX® 1951
Industrial Terrazzo

Industrial Terrazzo
- steel grey

ROMPOX® 1953
Industrial Terrazzo
- tile red

ROMPOX® 1954
Industrial Terrazzo
- RSG ochre

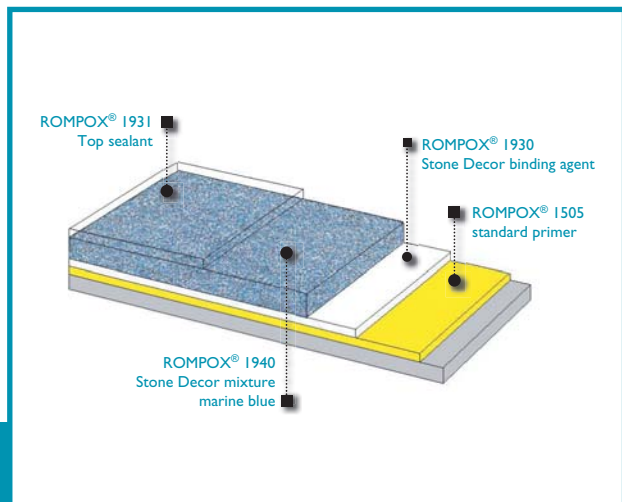

ROMPOX® 1955
Industrial Terrazzo
- orient green

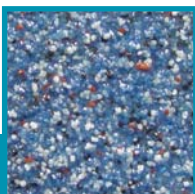

ROMPOX® Stone Decor

ROMPOX® Stone Decor is decorative, chemically highly resistant and has very high abrasion resistance. By sprinkling decorative sands, a nonslip surface according to R11 can be achieved. The recommended layer thickness is 4 mm depending on intensity of use.

ROMPOX® Stone Decor is ideal for supermarket sales areas selling food and refrigerated rooms with customer access which need to be nonslip for safety reasons.

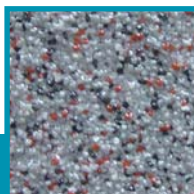

System set up of ROMPOX® Stone Decor, for example 1940 – marine blue

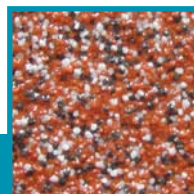

ROMPOX® 1940
Stone Decor
- marine blue

ROMPOX® 1941
Stone Decor
- salt and pepper

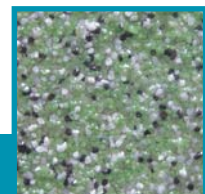

ROMPOX® 1942
Stone Decor
- steel grey

ROMPOX® 1943
Stone Decor
- tile red

ROMPOX® 1944
Stone Decor
- RSG ochre

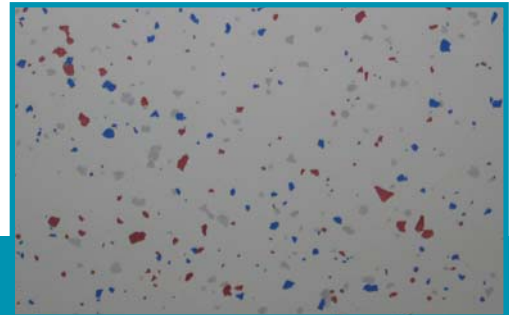

ROMPOX® 1945
Stone Decor
- orient green

ROMPOX® 1910 Decorative Chips

ROMPOX® Decorative Chips is a decorative coating with sprinkled PVC chips and a transparent topcoat sealant.

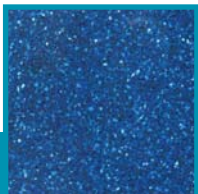

ROMPOX® 1910 Decorative Chips is ideal for sales rooms, department stores, offices, museums, show rooms, nurseries and schools, i.e. all rooms in which the decorative effect of the floor should transmit positive impressions and allow ease of cleaning.

ROMPOX® 1910 Decorative Chips

Each ROMPOX® 1910 Decorative Chips coating can be duplicated, in spite of the large number of coloured variations that are possible. 26 standard colours and innumerable special colours, as well as single colour or decorative chip mixtures, are available for easy sprinkling and clear view of the primary coating.

Here some examples of colours and chip mixtures:

ROMPOX® 1910
Decorative Chips Binding
agent + ROMPOX® 1920
chip mixture
- marine blue

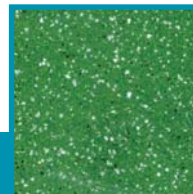

ROMPOX® 1910
